**HUDSON RESOURCES APPOINTS BRUCE COUNTS  
AS TECHNICAL ADVISOR TO THE COMPANY**

VANCOUVER, B.C. – May 25, 2004 – Hudson Resources, Inc. (TSX Venture Exchange: HUD), today announced that Mr. Bruce Counts has been appointed as a technical advisor to the Company.

Mr. Counts has been working with Hudson Resources for two years through his consulting company LithoQuest. Bruce is a Professional Geophysicist with more than 12 years of experience in diamond exploration. He was an integral member of the discovery and development team at the Ekati Diamond Mine and went on to become a senior consultant to Dia Met Minerals on their international portfolio of projects. More recently, Bruce has made a significant contribution to the discoveries on the Churchill Project with Shear Minerals. In January 2004, Mr. Counts became President of Indicator Minerals Inc., a TSX Venture listed company focused on diamond exploration in Canada's eastern arctic.

"Bruce's background and relationships with the Canadian diamond industry have helped us establish a solid exploration program for our Greenland project", said James Tuer, President and Director. "Bruce is well acquainted with our exploration targets in Greenland after having managed Dia Met's program there in the late 1990's. It is interesting to note that Chuck Fipke's, Metalex Ventures Ltd. was recently awarded an Exploration Licence immediately to the north of Hudson's ground. This entire area was the focus of Dia Met's early exploration forays into Greenland".

Along with the appointment to Technical Advisor, Hudson has granted Mr. Counts incentive stock options under the company's stock option to purchase a total of 50,000 treasury shares at a price of 35 cents per share. The options are exercisable for a period of five years, subject to the policies of the TSX Venture Exchange.

**About Hudson Resources**

Hudson Resources, Inc., is a Vancouver, B.C.-based company focused on diamond exploration in West Greenland. The company has a direct 100% interest in 558 square kilometres (218 square miles) in the Sarfartoq region, near Kangerlussuaq, Greenland. It has a further 80% interest in an additional 765 square kilometers (300 square miles) via a joint venture with New Millennium Resources NL. This highly prospective area is situated on the same Archean craton that hosts the major diamond discoveries in Canada. Hudson trades on the Toronto Venture Exchange under the symbol HUD.
