HUDSON ARRANGES GEOPHYSICAL SURVEY AND PROPOSES PRIVATE PLACEMENT

Vancouver, BC - **HUDSON RESOURCES INC.** ("Hudson" – TSX Venture Exchange "HUD") announces that it has entered into an agreement with Fugro Airborne Surveys Corp. to fly a Dighem Mag-EM geophysical survey for the Company in West Greenland. The survey will be conducted on 100m intervals for a total of approximately 2,000 line kilometres. The program is expected to commence around June 20th and take up to 10 days to complete.

The areas to be covered by the survey have never been flown in the past. Furthermore, two of the areas have yielded diamonds from local kimberlite samples. As well, till samples from all of the areas have been proven to contain superior kimberlite indicator mineral chemistry supporting the view that at least one diamondiferous kimberlite body exists in the area. A field program is expected to commence on about July 5th to follow up targets prior to a drill program.

As well, Hudson proposes to complete a non-brokered private placement of up to 1,700,000 units at a price of 30 cents per unit to raise gross proceeds of \$510,000. Each unit will consist of one common share and one-half non-transferable share purchase warrant, each full warrant entitling the holder to purchase one additional common share for a period of one year from the closing day at an exercise price of 40 cents per share. The warrants will contain provisions for earlier conversion in the event that the company's shares trade for any 10 consecutive days at a weighted average trading price exceeding 80 cents per share. A finder's fee will be paid to arm's-length parties on this private placement.

The proceeds of the placement will be used to advance the Company's Greenland diamond properties. The terms of the private placement are subject to the acceptance for filing by the TSX Venture Exchange.

About Hudson Resources

Hudson Resources, Inc., is a Vancouver, B.C.-based company focused on diamond exploration in West Greenland. The company has a direct 100% interest in 558 square kilometres (218 square miles) in the Sarfartoq region, near Kangerlussuaq, Greenland. It has a further 80% interest in an additional 765 square kilometers (300 square miles) via a joint venture with New Millennium Resources NL. This highly prospective area is situated on the same Archean craton that hosts the major diamond discoveries in Canada. Hudson trades on the Toronto Venture Exchange under the symbol HUD.
