## **HUDSON INITIATES 2005 GREENLAND DIAMOND PROGRAM**

Vancouver, BC – February 28, 2005 - **HUDSON RESOURCES INC.** (“Hudson” – TSX Venture Exchange “HUD”) is pleased to announce the commencement of its 2005 Greenland diamond exploration program. Starting today, the ground-based geophysical crew will be on site preparing to generate approximately 120 line km of magnetic data and 30 line km of HLEM electromagnetic data over eight grids. It is expected to take 2 to 3 weeks to complete this program.

Drilling is expected to commence by mid-March. The drill has been shipped from Canada and is on track to arrive by March 10, 2005 at Maniitsoq on the west coast of Greenland. The drill will then be transported 100 km into the field by Twin Otter.

The purpose of the ground geophysical program is to integrate these results with the 2004 airborne Dighem survey and prioritize drill site locations. The program will focus heavily on areas where mineral chemistry in the tills has been determined to be derived from the diamond stability field. Highlighting the program so far are the Garnet Lake and the Spider Lake areas where a number of magnetic and EM targets will be further constrained.

The Garnet Lake area generated the significantly diamondiferous kimberlite discovered last summer when Hudson found 151 diamonds in a 108 kg sample, of which 9 were classified as macrodiamonds weighing a total of 0.088 carats. The Spider Lake area has diamondiferous kimberlite dikes radiating from a deep seated circular anomaly within the lake. Hudson will also investigate a very strong linear conductor that it believes may host a massive sulfide body. EM inversion analysis shows it to have a linear extent of approximately 2 km and a potential width of 50m.

Grant Lockhart, Petra Geophysical Consulting, has been responsible for reviewing the Dighem survey and preparing the exploration grids. He will provide quality control as the program develops in the field and assist Hudson in targeting the drill once it arrives on site.

Hudson Resources will be an exhibitor in the Investors Exchange area of the Prospectors and Developers Conference in Toronto on Tuesday March 8 and Wednesday March 9 (Booth No. 2635). For more information on attending this free conference, located at the Metro Toronto Convention Centre, please visit [www.pdac.ca](http://www.pdac.ca).

BY ORDER OF THE BOARD OF DIRECTORS
